

PHASEONE

This recommendation is written to relay our satisfaction concerning the work we've created with our freelance UI graphic designer: **Michael Witus Schierup**.

Throughout the past ten years, we have consulted Michael in the development of the interface of our highly popular tethered photo editing software: **Capture One**, its tablet, and smart device companion app: **Capture Pilot**, our high-end camera digital backs: **IQ-series** and **Credo GUIs** and lastly our **100MP XF Camera**.

Michael is a humorous and talented designer that we enjoy inviting to our headquarters in Copenhagen. We work with him both on- and off-site, with excellent results. We're pleased with his rates and deliverables, and in our experience, he works at a very professional level. We have yet to give him a vector task that he cannot solve.

Jacob Frost *R&D manager, Application Software, Phase One A/S*
